

CAN YOU SEE ME?

Improving access for individuals with autism

Autism affects 1 in 100 people

Autism is a life long condition, so affects both children and adults

Autism is a hidden disability

Individuals with autism find it difficult to access shops, social and leisure activities

By making small changes you can make a big difference to individuals with autism

Whilst some people may not want you to know they have autism, some do.

Many people will find it difficult to tell you.

We have developed this scheme to help you recognise when someone is on the autism spectrum and understand how you can help.

We are very grateful to you for taking part.

When you see this pattern, it means that someone has autism:

You may see it on a wristband, card or mobile phone.

Please refer to the additional information outlining how you can support individuals with autism and visit our website for further information and resources
